**Subject:** San Jacinto River Waste Pits TCRA Cap Inspection activities.

As part of the site's ongoing TCRA Cap monitoring, the site's contractors will be onsite this week to conduct routine cap maintenance related activities. Local community members... may notice workers and equipment through this week and be concerned. However the site's cap RP contractors under the direction of Valmichael Leos, EPA, and David Keith, Anchor QEA, LLC will be onsite starting today to conduct vegetation control around the signs and on top the site.

Thanks.
